

Facilities Reduction Program Launches Quarterly E-newsletter

The Facilities Reduction Program is preparing to send a quarterly FRP newsletter to FRP managers and other stake holders in order to better communicate FRP issues, tips, best practices, and other important information. The goal is to accomplish more cost-effective and problem free FRP projects and facilitate greater two-way communication between the FRP Team Captains at Huntsville Center and the FRP field managers and Garrison Directorate of Public Works (DPW) staff.

The E-newsletter will provide information regarding recent successes in the Facilities Reduction Program, as well as important tips about future project funding opportunities. The newsletter will also highlight new activities, tools, and subjects that will better assist you in successfully managing your FRP projects. Current and key contact information for all regional FRP team captains will be available in the E-newsletter as well.

"The E-newsletter will enable us to provide a timely and more accurate stream of relevant FRP information to the DPWs and other personnel that we communicate with the most," said Michael Norton, FRP Program Manager. "This is one of several means of communication we are utilizing to ensure personnel at installations have the latest information regarding FRP news and funding opportunities."

The E-newsletter will be sent via email in HTML format. The contents will be easily readable using any email client. The E-newsletter will serve as a natural extension of the FRP Best Practices Toolbox and much of the content found on the newsletter will be hosted within the FRP Best Practices Toolbox Library.

At a minimum, we would like this E-newsletter to reach each Army Installation FRP Manager, as well as those personnel who regularly support FRP projects. If you are not the FRP Manager at your Installation, please forward this email to the appropriate person.

In addition, any other interested person can subscribe to the Facilities Reduction Program Quarterly E-newsletter or submit comments, feedback, or suggestions by clicking the appropriate link below:

The screenshot shows the header of the newsletter with the title "Facilities Reduction Program Best Practices Toolbox E-newsletter" and the date "September 2007". The main content includes three articles: "Facilities Reduction Program Launches Quarterly Newsletter", "FRP Releases White Paper on Concrete C&D Debris Diversion", and "Those WWII Buildings Must Go". Each article has a "Staff Report" sub-header and a "Read more" link. On the right side, there are two boxes: "FRP Team Contacts" listing Michael Norton, Kevin Healy, David Hill, T. E. Shirley, and Todd Watts with their titles and phone numbers; and "Did You Know?" providing information about the FRP Best Practices Toolbox and a link to "Check it out.". At the bottom, there is a "Viewing links in this newsletter may require the free Adobe Acrobat Reader" notice with a download icon.
